WARHAMMER

THE OLD WORLD

DWARFEN MOUNTAIN HOLDS FLAME CANNON

ASSEMBLING METAL MODELS

Before assembling your model, read through these instructions carefully. To assemble this kit you will need an adhesive suitable for metal, some modelling files and a Citadel modelling knife. A pair of Citadel clippers can also be useful for removing components from the sprue. Carefully remove any mould lines and flash using your modelling files and knife (remember when using a modelling knife to cut away from your body and fingers).

Before gluing the components together, it is a good idea to dry fit them. This allows you to check if there are any uneven joins or gaps. If there is an uneven join, use a modelling file to even it out before gluing. Then glue the components together. If, once the glue has set, there is a gap, use a small amount of Citadel Liquid Green Stuff to fill it.
