Preparing the Model for Assembly

Before assembling the model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. Then, remove any excess resin such as mould lines, casting gates, vents and shims. For a more detailed guide to working with resin models, go to the Downloads section of the Forge World website.

This kit contains all the pieces required to construct a Mars-Alpha Pattern Warbringer Titan Head. To glue the resin pieces together, use Citadel Super Glue.

NOTE: We have cast this kit using the most advanced techniques and the best quality resin, but due to the nature of the casting process, your model may contain small air bubbles. These can be filled with model filler or super glue. Any slight warpage of thin parts can easily be corrected by immersing the part in hot water for about 1 minute, then carefully bending it back into shape.

If you need to contact the Forge World Customer Service team regarding this model, you can get in touch via email – forgeworld@gwplc.com – or call:

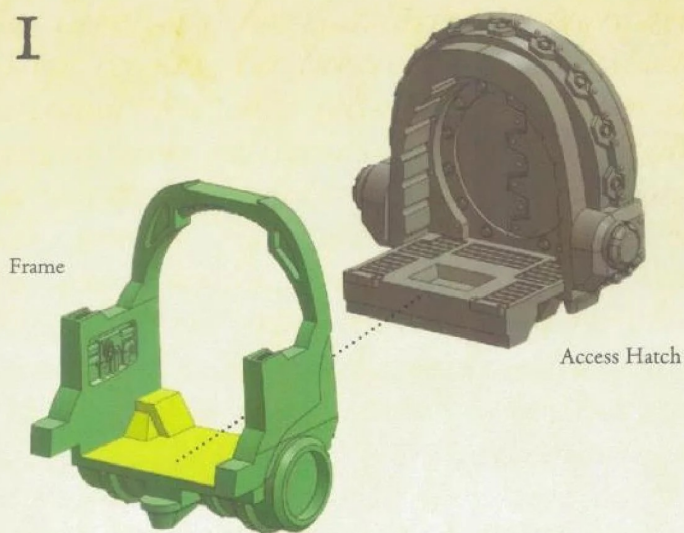

0115 900 4995 within the UK

011 44 115 900 4995 from the USA and Canada

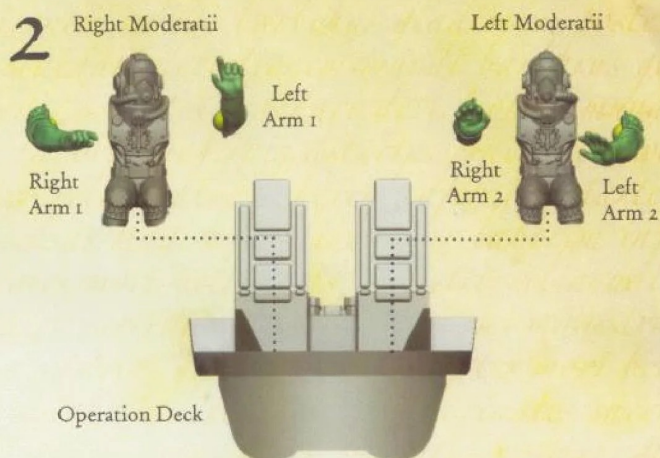

0011 44 115 900 4995 from Australia

011 44 115 900 4995 from Europe and the rest of the world.

I

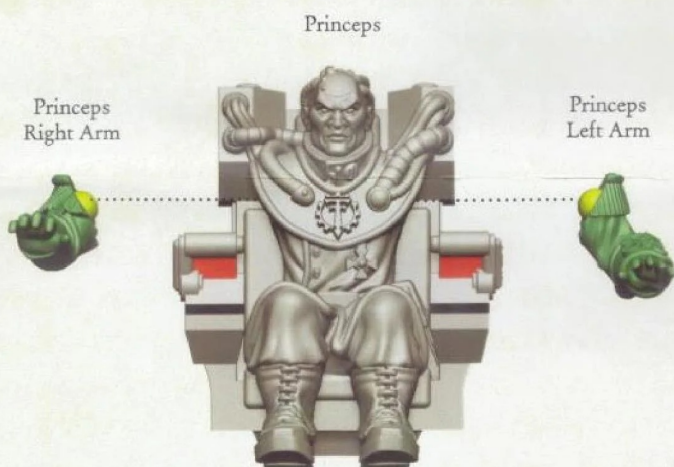

2

If you do not wish to use the crew, skip steps 2 and 3.

3

Principes Assembly

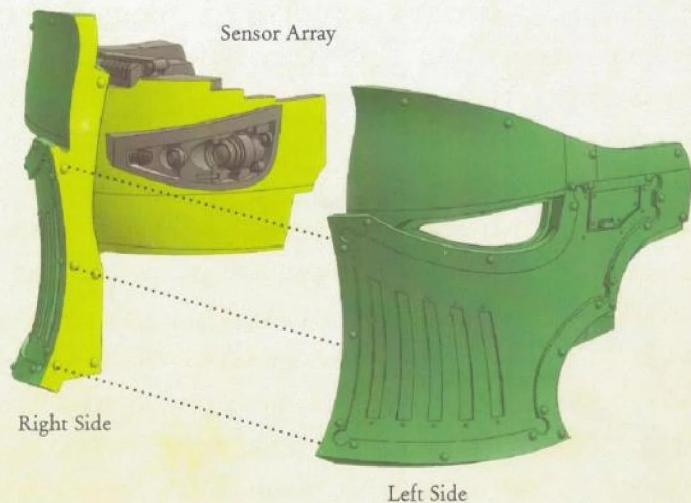

4

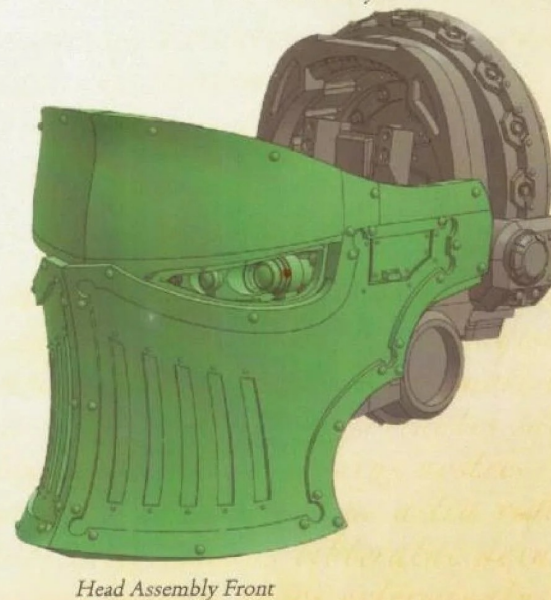

There is an optional empty Principes Throne, which can be used instead of the Principes Assembly.

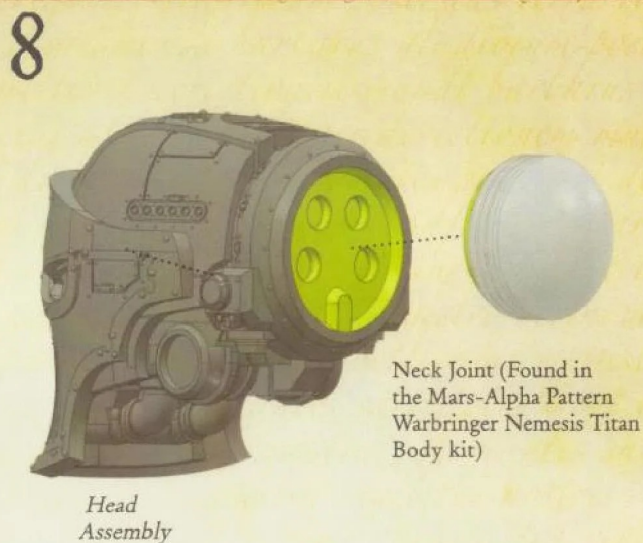

5

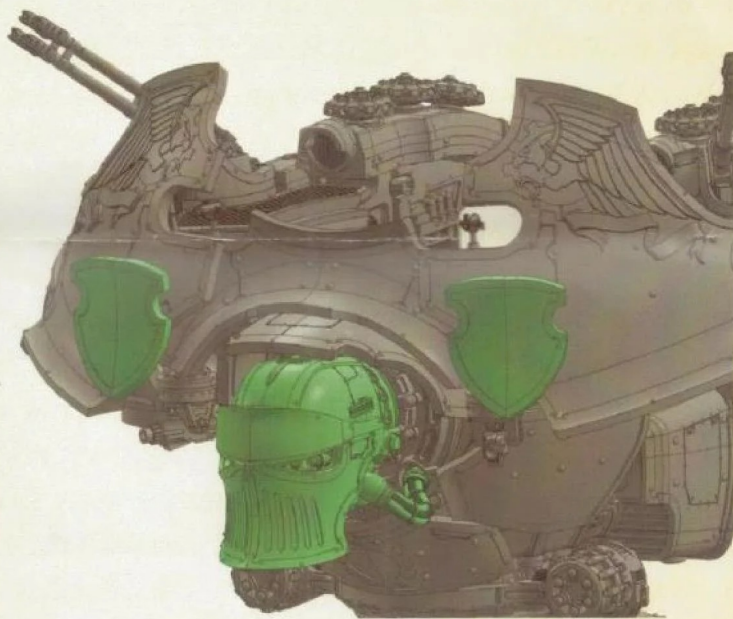

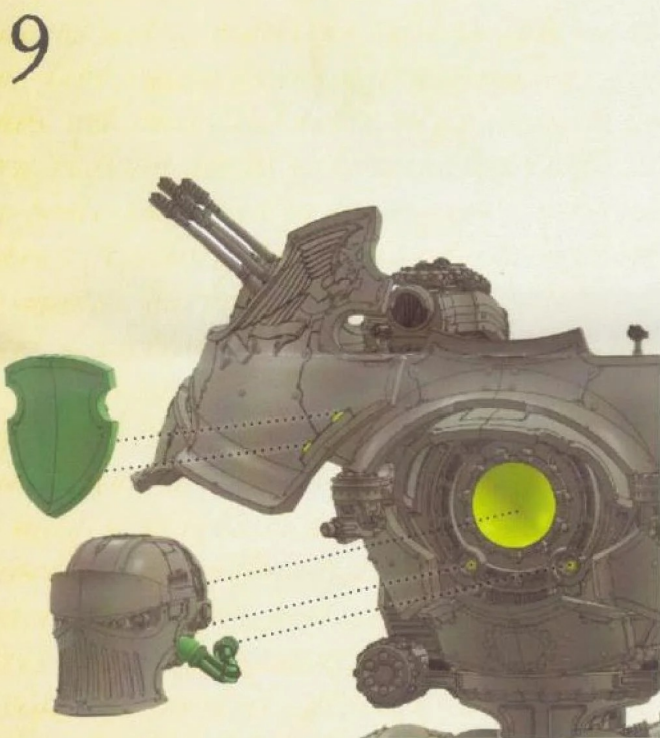

6

Head Assembly Rear

! If you wish to keep the head removable so that you can view the crew inside, you can magnetise the Mars-Alpha Pattern Warbringer Head (6 x 2mm magnets sold separately) instead of gluing it in place.

! To magnetise the Right and Left Side Cables use 4 x 2 mm magnets sold separately.

Final Assembly

Once the Mars-Alpha Pattern Warbringer Titan Head and the Heraldic Shields have been painted, mount them onto the Warbringer Nemesis Titan's body, as shown.

Painting

If you want to paint the interior of the Mars-Alpha Pattern Warbringer Titan Head, then it is a good idea to paint the parts prior to assembly. It is also easier to paint the crew members before inserting them into the cockpit.
